

ALISHA KHURSHID

📍 Lahore, Pakistan — 📞 +92 3251792141 — ✉️ khurshidalisha918@gmail.com — 🌐 github.com/Alisha994-ui

PROFESSIONAL SUMMARY

Results-driven Computer Science graduate from UET Lahore (CGPA 3.18) with an RHCSA certification and hands-on experience in DevOps practices. Skilled in Linux, Docker, Git, Jenkins, and Bash scripting, with foundational knowledge of Kubernetes, Ansible, and AWS. Demonstrated ability to work on real-world projects and adapt quickly to new technologies. For the Final Year Project, developed an AI-powered security camera system capable of detecting weapons in live video streams, recognizing faces, and sending instant alerts with location details to relevant authorities. Passionate about continuous learning, problem-solving, and contributing effectively in collaborative and technology-driven environments.

TECHNICAL SKILLS

DevOps & CI/CD: Docker · Docker Hub · Kubernetes · Jenkins · Ansible · CI/CD Pipelines · Git · GitHub

Cloud & Infrastructure: AWS · Linux (Kali / CentOS / Ubuntu) · SSH

System Administration: User & Group Management · File Permissions · Process Control · Networking Basics

Programming: Python · Bash · PHP · JavaScript · HTML · CSS

Database: MySQL · SQL

AI / ML Stack: OpenCV · YOLOv10 · I3D · RetinaFace · React Native · Node.js

PROJECT EXPERIENCE

AI-Based Weapon Detection & Face Recognition System

Final Year Project

Python · OpenCV · YOLOv10 · I3D · RetinaFace · React Native · Node.js

A real-time AI surveillance platform that detects weapons, recognises individuals, and dispatches instant geo-tagged alerts — built end-to-end from model training to mobile deployment.

- Ran YOLOv10 (weapon detection) and I3D (suspicious-activity recognition) concurrently on live CCTV feeds, achieving real-time multi-threat analysis.
- Integrated RetinaFace to match detected individuals against a database, reducing false-positive alerts and supplying authorities with accurate identification data.
- Engineered an automated alert pipeline that dispatches threat type, GPS location, timestamp, and snapshot to security staff within seconds of detection.
- Fine-tuned models on low-light and high-density crowd datasets, significantly improving detection accuracy under real-world CCTV conditions.
- Delivered a React Native mobile app enabling security personnel to receive live alerts, review flagged clips, and respond to incidents remotely.

Dockerized Web Application

Infrastructure / DevOps

Docker · Docker Hub · Bash · Linux

Packaged a web application into Docker containers for reliable, one-command deployment across any machine or server.

- Authored multi-stage Dockerfiles that reduced final image size by retaining only production-required layers.
- Implemented versioned image tagging and Docker Hub publishing, enabling instant team-wide rollback to any prior release.
- Configured inter-container networks to isolate services and prevent cross-service interference, then validated end-to-end post-deployment behaviour.
- Wrote comprehensive setup documentation so any team member can spin up the full stack with a single command.

Bash • Cron • Linux

Automated incremental backups on a Linux server, eliminating manual intervention and ensuring reliable data recovery.

- Developed an incremental Bash script that compresses only new/changed files, appends timestamps to filenames, and maintains configurable retention windows.
- Scheduled execution via cron; implemented structured logging and failure-alerting to surface issues without manual monitoring.
- Validated the full backup-and-restore cycle on a test server, confirming data integrity and successful recovery under simulated failure scenarios.

EDUCATION

BS Computer Science <i>University of Engineering & Technology (UET) Lahore — New Campus</i>	2022 – Present CGPA: 3.18 / 4.00
Intermediate in Computer Science (ICS) <i>Punjab Group of Colleges, Lahore</i>	2020 – 2022 89%
Secondary School Certificate (Matric) <i>Society Public School, Lahore</i>	2018 – 2020 93%

CERTIFICATIONS

RHCSA — Red Hat Certified System Administrator	Red Hat
DevOps Certification	Industry Training
Linux Administration Training	Industry Training

CORE COMPETENCIES

Problem Solving • Team Collaboration • Clear Communication • Fast Learner • Attention to Detail • Adaptability
